GridMe: Adobe-approved, live on the official Marketplace · CrazyUI v2 launched · 4 self-built products shipped solo

SKILLS

Languages: TypeScript, JavaScript, Python

Frameworks & Libraries: React.js, Next.js, React Native, Node.js, Express.js, Redux, Three.js, GSAP, Framer Motion, Tailwind CSS

Databases & Cloud: MySQL, MongoDB, Supabase, Firebase, Appwrite, Cloudflare, Shopify, Git, CI/CD

WORK EXPERIENCE

Website Developer — [DZINR \(Branding Agency\)](#), Mumbai

Sept 2025 – Present

- Owned end-to-end development of the agency's marketing site, shipping a high-performance, animation-rich UI with Next.js, GSAP, and Framer Motion
- Grew organic traffic to ~10K monthly users by leading SEO and performance optimization
- Shipped multiple client projects end-to-end, turning ambiguous requirements into fast, production-ready builds
- Built an internal news and case-study CMS from scratch, cutting the team's content-publishing time

Tech: Next.js, TypeScript, Node.js, Express.js, MySQL, REST APIs, Tailwind CSS, Git

Website Developer — [Novem Controls](#), Chandigarh

Jan 2025 – July 2025

- Automated certificate generation and real-time attendance tracking, eliminating manual internal-ops workflows
- Built and deployed Node.js/Express backend services, improving data-processing speed and reliability
- Owned deployments across VPS environments while delivering scalable features on a small team

Tech: React.js, Node.js, SQL, REST APIs, Git, MongoDB, Render, AWS

PROJECT WORK

CrazyUI.com — Figma & Framer Component Library

2026

- Reverse-engineered Figma and Framer's internal clipboard formats to enable native, drag-and-drop component transfer between platforms
- Eliminated Framer's paid lock-in by building a custom auth, database, and payments stack from scratch
- Launched V2 with an expanded Framer component library and new pre-built templates for faster design handoff
- Drove 10,000+ impressions on launch day through influencer-led distribution

GridMe — Adobe Illustrator Extension for Brand Designers

2026

- Approved by Adobe and live on the official Adobe Marketplace, one of a small number of independently built extensions to pass Adobe's review
- Built a CEP extension that auto-generates logo construction grids, clearspace zones, color palettes, and presentation sheets
- Built one-click installers for macOS and Windows using pkgbuild and NSIS
- Implemented offline license validation via Supabase and Polar, with silent 7-day revalidation
- Converted first paying customers within weeks of Adobe approval

PullSRC — Site Asset Extraction Tool

2026

- Built a tool to extract images, fonts, color palettes, and media assets directly from any live website
- Engineered with Next.js on Vercel, puppeteer-core for site scraping, and ffmpeg.wasm for client-side media processing
- Live as a web app at pullsrc.byavi.in and as a [Chrome extension](#) on the Chrome Web Store

Tingy — Advanced Image Compression, Open Source

2025

- Built an open-source, Sharp-based compression engine using binary search to hit target file sizes with minimal visual loss
- Achieved up to 99% size reduction (9MB to ~90KB) while preserving visual quality
- Added bulk compression and precise size targeting for teams optimizing web performance at scale

EDUCATION

CT Institute of Engineering, Management and Technology, Punjab

Aug 2021 – July 2025

Bachelor's in Computer Science and Engineering | CGPA: 8.0 / 10
