Full Stack Developer building fast, interactive web products focused on performance and UX

Skills:

Languages: python, JavaScript TypeScript

Frameworks & Libraries: React.js, Next.js, React Native, Node.js, Express.js, Redux, Three.js, GSAP, Tailwind CSS

Databases & Cloud / DevOps: MySQL, MongoDB, Redis, Git, CI/CD, Cloudflare, Firebase, Supabase, Appwrite

Work Experience:

DZINR (Branding Agency) Mumbai — *Website Developer*

Sept 2025 – Present

- Owned end-to-end development of the agency website, building high-performance, animation-rich UI using Next.js, GSAP, and Framer Motion
- Scaled platform to ~10K monthly users through SEO and performance optimization
- Delivered multiple client projects, converting requirements into fast, responsive web experiences
- Built internal news & case study platform to streamline content publishing.
- **Tech Stack:** NodeJS, ExpressJS, MySQL, NextJS, TypeScript, REST APIs, ReactJs, Tailwind CSS, MySQL, Git

Novem Controls (service agency) Chandigarh — *Website Developer*

Jan 2025 – July 2025

- Developed internal web tools to automate certificate generation and real-time attendance tracking, reducing manual workflows.
- Built and deployed backend services using Node.js and Express, improving data processing.
- Collaborated within a team to deliver scalable features and handled deployments on VPS environments
- **Tech Stack:** React.js, Node.js, SQL, REST APIs, Git, MongoDB, Render, AWS

Project Work:

CrazyUI.com- Figma & Framer Component Library (2026) [Live Url](#)

- Reverse-engineered Figma & Framer's internal copy-paste formats to enable native component transfer
- Bypassed Framer's paid ecosystem by implementing custom auth, database, and payment flows, eliminating lock-in
- Built and launched product used by 10K+ users on day one, with active usage and revenue

Tingy- Advanced Image compression (2025) [OpenSource](#) | [Live Url](#)

- Built to solve inefficient and paywalled image optimization workflows
- Engineered a Sharp-based compression engine with binary search, achieving up to 99% size reduction with minimal visual loss. That can make your 9MB → ~90KB with minimal visible loss.
- Supports bulk compression and precise size targeting for faster web performance

Education:

CT institute of engineering management and technology, Punjab

Aug 2021 - July 2025

Bachelors in Computer Science and Engineering

CGPA: 8/10
